Use a ruler and set up a coordinate plane with x and y axes where each line represents one unit (you will want to look at the smallest and largest x and y coordinates to help you determine how big of a grid to create so that the logo fits). Plot the following points on a sheet of graph paper. Be sure to use a pencil and label each point as soon as you plot it. Then, follow the instructions for connecting the points. Add color to the logo when you finish.

Rubric - Correctness ~ 70 pts  
Label points ~ 10 pts

Neatness ~ 10  
Color ~ 10

### Connect points...

- 1) A through J in order
- 2) J to A
- 3) K through Z in order
- 4) Z to AA
- 5) AA through AL in order
- 6) AL to K
- 7) AM through AZ in order
- 8) AZ to BA
- 9) BA through BC in order
- 10) BC to AM

**When you are finished,
